

GENERAL SECRETARY REPORT

Alessandra Manzoni

Dear colleagues,

I am very sorry not to be with you for the Study Day. I hope you have a lively and fruitful meeting.

I want to say that this has been a very interesting and lively year with many activities and participation.

I had some 'electronic' problem with my server and this caused some delay in information but nothing horrible happened, except my feeling guilty for not having understood that immediately.

It has not been possible to realize the meeting with the GAS society in London. Maybe we must think more about that.

There will be a participation of EATGA to JAGP congress in July.

There are many projects of workshops, (Aix en Provence, Naples, Croatia), that should be organized.

This year we did not have new members applications.

I think that we are in a very important moment, in which many changes are happening. Different ways of thinking about our work and our association are in the air.

The changes proposed in the last workshop, on which you will probably discuss, are the result of the EATGA ideology of these last years.

I think that through this experience of change, realized organizing the workshop with modalities which are different from past times, we are going to start a very interesting season of transformation and that we are opening to the society in a more transcultural way than before.

I am very sorry not to be present in this crucial moment.

My best wishes for a good work,

Alessandra
